Korchak E. A. The labour potential of the northern regions within the implementation of the state policy of the Russian Federation in the Arctic / E.A. Korchak; Institute for Economic Studies of the Kola Science Centre of RAS – Apatity: Publishing house of the Kola Science Centre of RAS, 2017. – 174 p.

ISBN 978-5-91137-338-2

The monograph is devoted to issues of the labor potential development in northern regions of Russia within the implementation of the state policy of RF in the Arctic. The study examined the theoretical aspects of the processes of forming labor potential of the northern regions of Russia, as well as foreign experience of state regulation of the processes of forming and use of labor potential of the northern territories; the modern features of the processes of forming and use of labor potential of the northern regions of Russia are considered, and the labor potential of the northern regions of Russia are analyzed from the standpoint of sustainable territorial development. For the purposes of scientific substantiation of labor potential development priorities in the Russian northern regions within the framework of implementation of the state policy of RF in the Arctic there is proposed a consolidated indicator - “integral index of labor potential quality”. The results of the integrated evaluation of the quality of labor potential of the northern regions of Russia are given. The institutional environment of forming and use of labor potential of the northern regions of Russia is analyzed, and institutional conditions determining the low level of material well-being and social tensions at the regional labor markets are revealed. The promising development priorities of the labor potential of the northern regions, as well as the challenges and tools for implementation of measures of state regulation of the processes of forming and use of labor potential of the northern regions of Russia as part of the Russian state policy in the Arctic are suggested.

The monograph is designed for a wide range of professionals, researchers, teachers and students of higher and secondary specialized educational institutions.
